

Landscape Rake

Landscape Rakes:

The GEM Landscape Rake is a strong robust attachment ideal for grading topsoil, scrub and stone removal, land & pond reclamation. The Hardox tines are designed to eliminate the requirement of a brace which allows a better flow of material and stops the tines from clogging.

- Designed for use in agricultural, landscaping and construction sectors.
- Available in a wide range of sizes from 0.5 tonne mini digger to 30 tonne excavator
- 1/2 inch Hardox tines in the Mini, Mid, Maxi and 3/4 in the Ultra.
- No tie bar going through the tines eliminates material clogging the rake.
- Heavy wall structural hollow section used in the barrel of all rakes.

Mini Rake (1.5T-3.5t)	1250	1500
Height (ins)	16	16
Width (ins)	48	60
Weight (lb)	77	93
Number of Tines	18	22
Tube used (ins)	3.5 ins	3.5 ins
Mid Rake (4-8T)	MID 1500	MID 1800
Height (ins)	23	23
Width (ins)	60	72
